

# Driver Installation Manual

(for TourBox Elite on Windows 8 computers using cable)

To connect TourBox Elite on Windows 8 computers via cable, you will need to install the extra driver, besides the TourBox Console software. Please refer to the information below for detailed instructions.

1. Please ensure you have downloaded and installed the latest version of the TourBox Console.

<https://www.tourboxtech.com/en/downloads.html>

2. Connect TourBox Elite to the computer via cable. Make sure the front indicator is on with white light.

3. Double click to open the driver zadig-2.7.exe.

On the pop-up window, all information shall look the same as in the picture below. If not, update manually (especially the content marked in the red box). After that, click the Install Driver button to install the driver.
